SUMMARY

Passionate Front-End Developer skilled in translating designs into clean, efficient code. Experienced in building responsive and interactive React applications with a strong focus on user experience. Driven to work on large-scale projects that positively impact society and deliver real value. Proficient in effectively leveraging AI-assisted tools to accelerate development and optimize workflow, while maintaining full control over code quality and architecture. Continuously learning and staying updated with the latest web technologies to build modern, innovative websites.

EDUCATION

Bachelor of Information Technology – Egyptian E-Learning University (EELU), Alexandria
October 2022 – Present | GPA: 2.9

KEY SKILLS

- **Languages & Tools:** HTML5, CSS3, JavaScript (ES6+), TypeScript, Java, Python
 - **Frameworks & Libraries:** React.js, Bootstrap, Tailwind, Firebase, Supabase
 - **Dev Tools:** VS Code, IntelliJ IDEA, NetBeans, Scene Builder, Chrome DevTools, Git & GitHub, Netlify, Vercel
 - **AI Tools:** ChatGPT, GitHub Copilot, Gemini, Grok, DeepSeek, Claude 3
 - **Soft Skills:** Teamwork, Communication, Time Management, Adaptability, Problem Solving, Continuous Learning
-

PROJECTS

Real-Time Chat Application | [GitHub](#):

- Built with React.js and Firebase. Supports real-time messaging, media sharing, authentication, and deployment via Netlify.

CPU Scheduling Simulator | [GitHub](#):

- Java and JavaFX application that simulates scheduling algorithms (FCFS, SJF, Round Robin, Priority). GUI built with Scene Builder

MyNotes | [GitHub](#)

- A full-stack notes management web app built with React (TypeScript) and Tailwind CSS, featuring Supabase for authentication, database, and file storage. Includes note tagging, search & filter, image upload with preview, profile customization, and optimized state management using Context API, useMemo, and useCallback.

JavaScript Projects Collection:

- [.LRC File Generator](#) – Syncs audio lyrics with timestamps and generate a .lrc file.
 - [GPA calculator](#) – Calculate current and cumulative GPA easily!
 - [CRUD App](#) – manage products data and save in the local storage.
 - [Websites Bookmarker](#) – bookmarking tool to save favorite websites.
 - [Password Generator](#) – Secure and customizable passwords generator.
 - [Portfolio Website](#) – A responsive site showcasing projects, skills, and contact details.
-

COURSES & CERTIFICATIONS

- React Internship – DEPI (Oct 2024)
 - React Course – ITC (Jul 2024)
 - React Front-End Development – Scrimba.com (Apr 2025)
 - Freelancing Skills – Elharefa (Oct 2024)
 - Business English – OTO Courses (Jul 2024)
-

EXPERIENCE & TRAINING

React Internship – DEPI (Apr 2024 – Oct 2024)

- Gained hands-on experience with React, Firebase, API integration, responsive design.
- Worked on individual and group projects including a full-stack graduation project.

Freelancing Course – Elharefa (Oct 2024 – Nov 2024)

- Learned personal branding, client communication, and market research.

Business English – OTO Courses (May 2024 – Jul 2024)

- Improved writing professional emails, attending meetings, and communication fluency.
